I am a positive, enthusiastic and competent Full Stack Developer who, over the years, has built up a diverse range of skills, qualities and attributes that guarantee I will perform highly in this role. I have extensive experience working both alone and as part of a team on often time-sensitive, challenging full stack development projects that require outstanding creative and technical capabilities and the ability to ensure all work is optimized across a wide range of platforms. I take my work as a Full Stack Developer seriously and this means I always ensure my skills are kept up to date within this rapidly changing industry. If you hire me as your Full Stack Developer, I assure you I will fit into your team quickly, I will always put the commercial needs of your business at the forefront of everything I do, and the work I carry out will be consistent to a first-class standard.

## Work History

2022-06 - Current

### ● Mobile App and Back-End Developer

*UNT Wholesale, Phnom Penh*

I am working as a Full Stack Developer build clean backend with C# asp.net involve in Clean Architecture with CQRS and frontend mobile application and web application.

Technologies we use:

- Dotnet (C#)
- Postgresql and MSSQL
- Docker, Jenkins and Bitbucket DevOps (CI/CD)
- Flutter Mobile Application
- Firebase (Firebase Cloud Messaging)
- Nginx Reverse Proxy

I am maintaining and developing several projects to help and control the warehouse such as New Arrival App, PO App, Change Location Items App, Stock Count App and Picking for Take Order.

I am using DotNet for building RESTful API, Docker Jenkins Bitbucket and Nginx Reverse Proxy for deploy the API. Using JWT for users authentication. Postgresql and Microsoft SQL Server for storing all the data. I am building mobile app for user friendly interface using Flutter(Android & IOS) push notification with Firebase Cloud Messaging(FCM).

2020-10 - 2022-06

### ● Web Developer

*Centric Kernel CO, LTD, Phnom Penh*

I worked on the whole project, design and development, as a full-stack web developer and a tech lead of a small team that has 3-4 developers working on a business control software system. In our development team, my tasks were: developing web back-end using asp.net, nodejs and JWT for user authentication. Using Microsoft SQL Server and MongoDB for data storage, and implementing SQL search requests of all kinds of filters. Customize query data for better performance. Working real time data with MongoDB and Nodejs(Typescript) for chat customer support as a microservice using RabbitMQ for Event-Driven. Developing front-end using HTML/CSS/TailwindCSS/Javascript/Typescript and Bootstrap (We used differences of CSS library because we were building different Web UI Project for late projects we used TailwindCSS). Using GIT and GitLab for code versioning management, IIS (Internet Information Service) for asp.net hosting, Linux Server and Nginx (Reverse Proxy) for nodejs and front-end hosting. Developed to serve any businesses to manage:

- Grocery stores
- Coffee shops
- HR management and etc.

We provide warehouse control, Sale, Purchase, Financial management and HR management and much more. Since I worked here I think we have offered to around 6-7k customers. It is working pretty well for over more than 2 years.

## Education
